Expert assessment

On multifunctional wet cleaning and disinfection station "PEREKSA" compliance with standards on chemical disinfectants and antiseptics adopted by the European Union with bactericidal, fungicidal, virucidal and sporicidal effectiveness.

The aim of the expert-examination is to determine the performance of the multifunctional wet cleaning and disinfection station "PEREKSA" in washing and deodorising and at the same time bactericidal, fungicid, virucidal and sporicidal compliance with the following standards adopted in the European Union:

- EN 14476+A2:2019. Chemical disinfectants and antiseptics - Quantitative suspension test for the evaluation of virucidal activity in the medical area - Test method and requirements (Phase 2/Step 1)
- EN 16615:2015. Chemical disinfectants and antiseptics. Quantitative test method for the evaluation of bactericidal and yeasticidal activity on non-porous surfaces with mechanical action employing wipes in the medical area (4- field test). Test method and requirements (phase 2, step 2)
- EN 13727+A2:2016. Chemical disinfectants and antiseptics - Quantitative suspension test for the evaluation of bactericidal activity in the medical area - Test method and requirements (phase 2, step 1)

The expert-controlled examination resulted in the following data:

Assessment of surfaces and Multifunctional station for wet cleaning and disinfection
"PEREKSA" sanitation compatibility

Surface type	Exposure	Visual assessment of surface appearance change		
		Minimum steam supply mode combined with disinfectant supply mode	Moderate steam supply mode combined with disinfectant supply	Maximum steam supply mode combined with disinfectant supply mode
Plastic	wiping method	the surface is unharmed	the surface is unharmed	the surface is unharmed
Ceramic tiles	wiping method	the surface is unharmed	the surface is unharmed	the surface is unharmed
Painted surfaces	wiping method	the surface is unharmed	the surface is unharmed	the surface is unharmed
Metal	wiping method	the surface is unharmed	the surface is unharmed	the surface is unharmed
Linoleum	wiping method	the surface is unharmed	the surface is unharmed	the surface is unharmed

Expert conclusion: The effectiveness of washing and deodorizing, as well as bactericidal, fungicidal, virucidal and sporicidal functions of the Multifunctional station "PEREKSA" fully complies with the standards adopted in the European Union regarding chemical disinfectants and antiseptics.
